

# Apprien Dashboard Guide

This guide describes the steps to take to add Your Game to Apprien Dashboard.

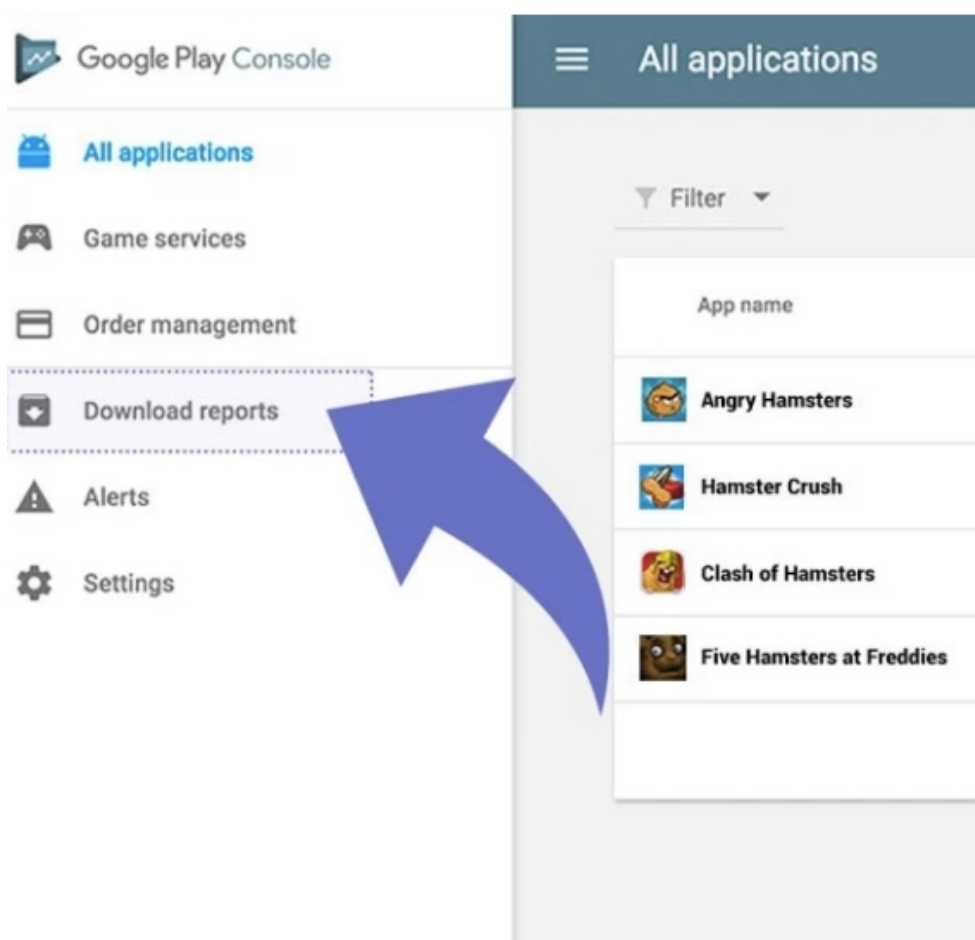

**1. Go through Apprien Integration tutorial document to receive Google API JSON credentials file.**

**2. Find our Your application's Bucket ID**

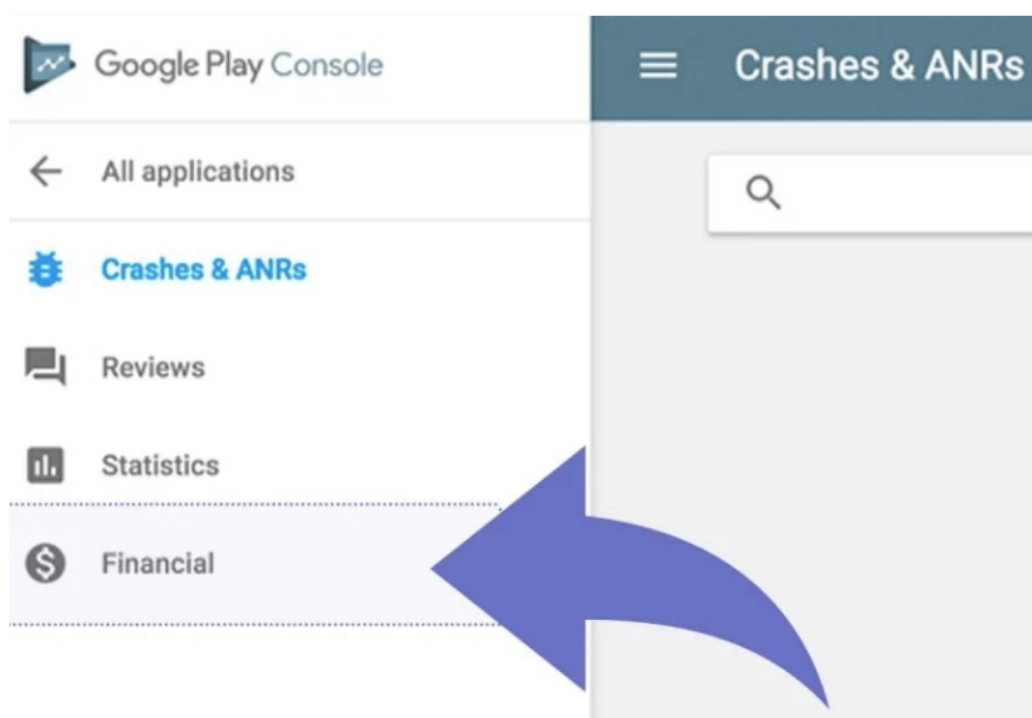

Sign in to your Google Play Developer Console: <https://play.google.com/apps/publish/>

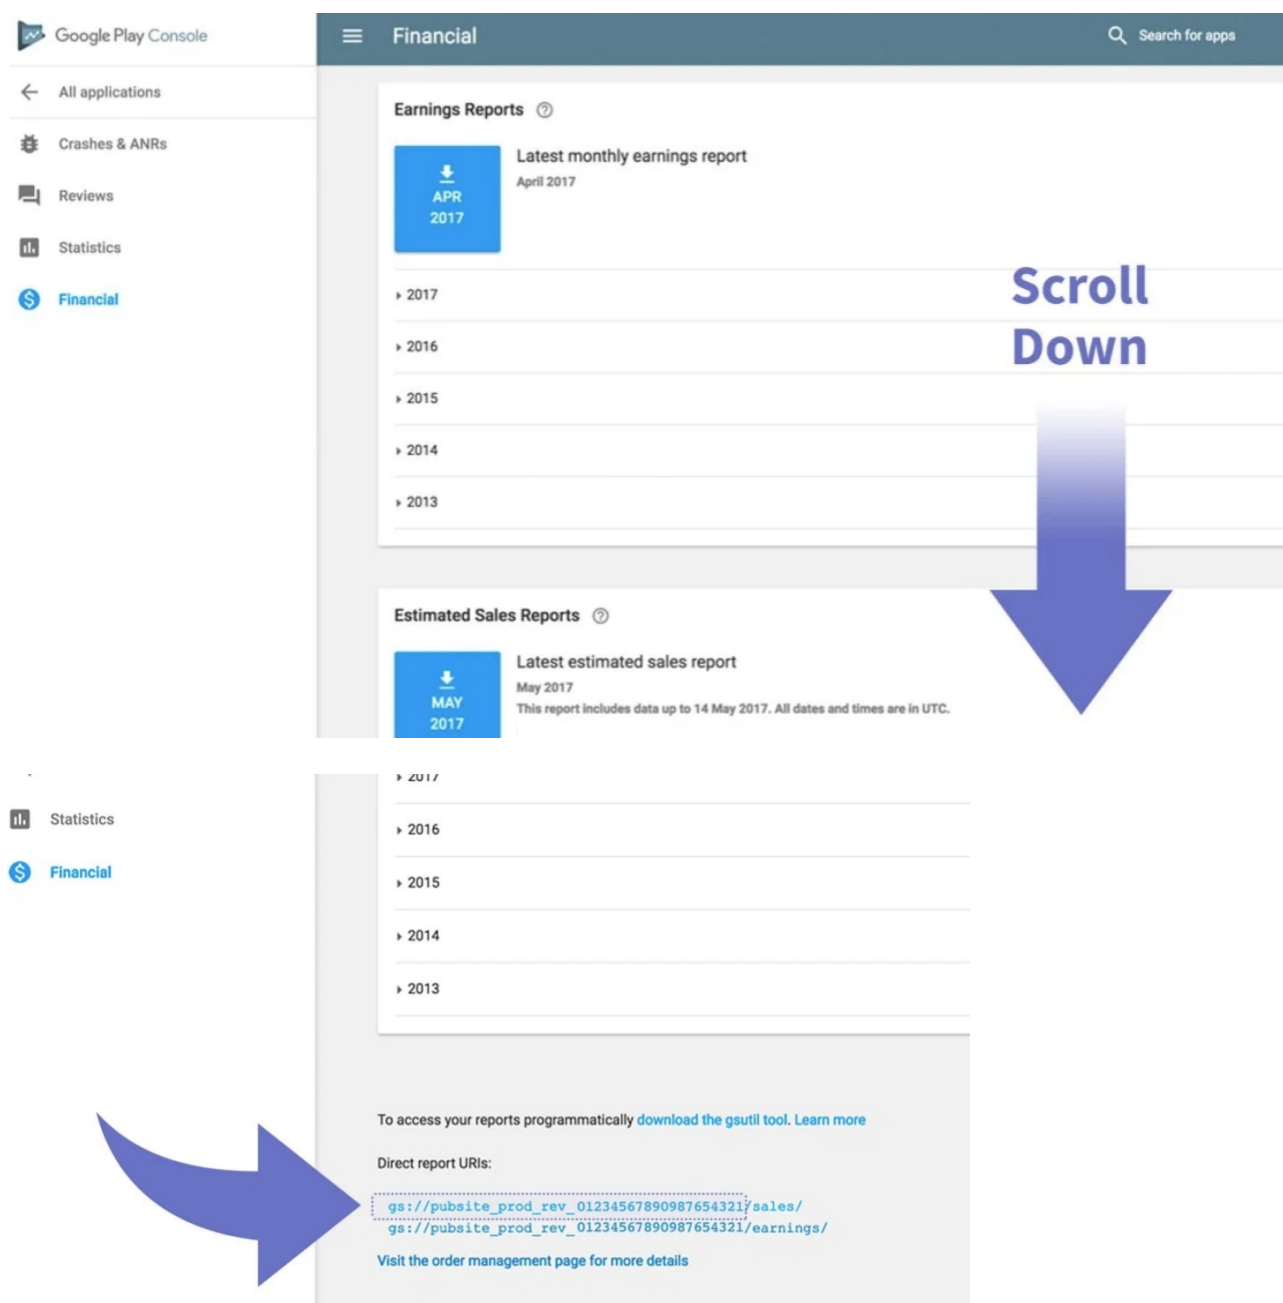

Click on “Download reports”.

Click on “Financial”.

Your Google Cloud Storage bucket ID is listed near the bottom of the page. It begins with gs://pubsite\_prod\_rev.

The screenshot shows the Google Play Console interface. On the left is a sidebar with navigation options: All applications, Crashes & ANRs, Reviews, Statistics, and Financial (selected). The main content area is titled 'Financial' and contains two sections: 'Earnings Reports' and 'Estimated Sales Reports'. Both sections show a download button for the latest report (APR 2017 for Earnings, MAY 2017 for Sales) and a list of years from 2013 to 2017. A large blue arrow with the text 'Scroll Down' points from the top section to the bottom section. At the bottom of the page, under the heading 'Direct report URIs:', two URIs are listed: gs://pubsite\_prod\_rev\_01234567890987654321/sales/ and gs://pubsite\_prod\_rev\_01234567890987654321/earnings/. A blue arrow points to these URIs.

Your Bucket ID would be in the form **pubsite\_prod\_rev\_1234567890987654321**

(Tutorial steps can be found on <https://resource.reflection.io/2017/05/17/finding-your-bucket-id-on-google-play/>)

### 3. Create Your game in Apprien Dashboard

In Your Apprien Dashboard site:

- Add Your Game's **Name**
- Activate the **Is integrated** checkmark

The screenshot shows the Apprien dashboard with two main sections: Games and Products. The Games section has a form with the following fields: Name (Game Name), Show Token, Stores (Google Play Store), and Game Store Integration (Is integrated checked). The Products section has a form with the following fields: Name, Stores, and a Save button. The Games section also has a Delete button. The Products section also has a Delete button. The Games section has a + Add game button. The Products section has a + Add product button. The Games section has a Show Token button. The Games section has a Game Store Integration section with a checkbox for Is integrated. The Products section has a Create or choose a game to create a product for it. message.

After activating the checkmark You will see additional fields that you'll need to fill:

- Add Your Game's **Google Credentials file** by choosing the **Google API JSON** credentials file from Your filesystem
- Add Your Game's **Package Name** (Important: name is case sensitive)
- Add Your Google Play Developer's **Bucket ID**

The screenshot shows the Apprien dashboard with two main sections: Games and Products. The Games section has a form with the following fields: Name (Game Name), Show Token, Stores (Google Play Store), Game Store Integration (Is integrated checked), Google Credentials file (Choose File), Package Name (fi.phz.yourgamespackagename), and Bucket ID (pubsite\_prod\_rev\_1234567890987654321). The Products section has a form with the following fields: Name, Stores, and a Save button. The Games section also has a Delete button. The Products section also has a Delete button. The Games section has a + Add game button. The Products section has a + Add product button. The Games section has a Show Token button. The Games section has a Game Store Integration section with a checkbox for Is integrated. The Products section has a Create or choose a game to create a product for it. message.

After adding all the required data Press the **Save** button to finish the integration between Your application and Apprien.

You are now able to add **Products** for Integration.
